ZEHNDER DESEO VERSO

STUDIO COLLECTION ZEHNDER DESEO VERSO

The Deseo Verso electric crystal radiator from the Zehnder Studio Collection combines high comfort, modern design and excellent functionality. The elegant crystal heating surface in black, white or mirror finish lends charm to this designer radiator, which blends harmoniously into the different architectures of the bathroom. A special feature of the product: one or two removable towel rails, depending on the model, mounted on the back of the radiator. The towel "disappears" behind the glass surface, ensuring an aesthetically pleasing bathroom. The towels are also optimally heated behind the radiator. The convenient push-to-open and push-to-close function of the towel rail makes it easy to hang up towels. When installing the towel rail, you can choose whether to pull the towel rails out to the right or left, allowing for a high degree of flexibility in bathroom design. Thanks to the latest infrared technology, the designer radiator provides pleasant heat in a very short time. The smooth glass surface makes cleaning simple and easy: maximum hygiene in the humid bathroom climate. And last but not least: it is extremely easy to operate, either by means of an intuitive touch panel directly on the radiator or by means of the practical remote control. Well thought out down to the last detail.

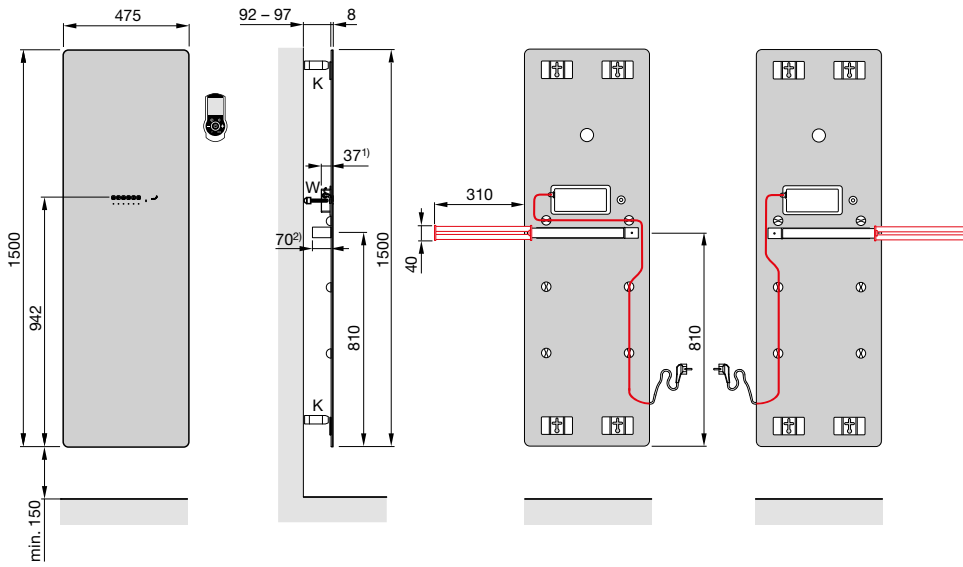

)

Advantages

- Modern and elegant design
- Practical: retractable towel bar on the back of the radiator for a tidy bathroom at all times
- Pleasant warmth in a very short time thanks to the infrared heating crystal surface
- Comfortable operation via touch panel or remote control
- Available for electric operation
