

LK Input link WSS

The LK Input Link WSS is an accessory for the LK Water Safety System WSS (packages Start, Standard and Standard plus). Used for wireless communication between the master unit and another system such as a home alarm in order to turn the water on and off. A timer function with delayed shutdown can also be used.

This product is supplied with a cable for connecting the device to external systems, along with a 5V power supply.

A total of max. 16 wireless or wired devices can be connected to the master unit in WSS.
